

Clean room

“ We'll take care of everything to make sure your clean space is good to go. ”

We understand how important it is to have the right environment for top-notch development work. We're excited to help you create a clean and organized space that perfectly fits your needs. We team up with well-known experts who provide high-quality materials and equipment. This way, you can be sure that your new workspace will meet the highest standards out there.

We'll take care of everything to make sure your clean space is good to go. This includes making sure it's up to the ISO certification standards, especially when it comes to handling delicate electronics without any static interference. We'll custom-design your space for each project, so that align with both the stringent technical mandates and the hygienic prerequisites.

Here's what we can do:

- Build structures of any shape and size
- Use solid or see-through walls for rooms
- Customize levels of acoustic insulation
- Plan rooms and air conditioning to meet the clean room ISO standards you need
- Certify that the floors and walls are antistatic
- Provide a wide range of antistatic equipment and vacuum systems
- Incorporate advanced access control systems

Just tell us what you need, and we'll make sure your workspace is all set up and ready for action!
